

PRELIMINARY Agenda | October 22-24 , 2018

Advanced course in Hernia surgery: TEP, TAPP & IPOM

Welcome

The advanced course for Hernia surgery will focus on the Tte procedure technique

The training program consists of a mix of live-surgery, giving an overview of the current surgical techniques, interactive lectures and Q&A sessions to share the best clinical practice and tips & tricks, enhancing surgical skills. Participants will have the opportunity to scrub-in and assist during the live-surgery.

On behalf of the faculty and Ethicon, we wish you a very instructive course!

Yours sincerely,

Matilde Segade
